

Purpose:

To show different fields for New Enrollment vs Re-Enrollment.

Steps:

1. Enrollment__c object → click Page Layouts.
2. Click New to create a layout for New Enrollment:
 - Clone from existing Enrollment Layout → name it New Enrollment Layout → Save.
 - Keep fields relevant for first-time enrollment: Student, Course, Instructor, Enrollment Date, Status, Fees, etc.
 - Remove unnecessary re-enrollment fields if any.
 - Click Save.

The screenshot shows the Salesforce Page Layout Editor for the 'Enrollment' object. The left sidebar contains a navigation menu with 'Page Layouts' highlighted. The main area is titled 'Create New Page Layout'. A yellow banner at the top states: 'As an option, you may select an existing layout to clone. If you create a page layout without cloning, your page layout will not include the standard fields.' Below this, the 'Existing Page Layout' dropdown is set to 'Enrollment Layout', and the 'Page Layout Name' field is 'New Enrollment Layout'. 'Save' and 'Cancel' buttons are at the bottom right.

Below the dialog, the 'Enrollment' page layout design is visible. The left sidebar lists various components: Fields, Buttons, Quick Actions, Mobile & Lightning Actions, Expanded Lookups, Related Lists, and Report Charts. The 'Fields' section is expanded, showing a list of fields with checkboxes for inclusion. The 'Information' section is highlighted, showing the following fields:

Field	Value
Enrollment Name	Sample Text
Student	Sample Text
Course	Sample Text
Instructor	Sample Text
Enrollment Date	12/22/2025
Enrollment Status	Sample Text
Fees Paid	✓
Comments	Sample Text
Course Fee	\$123.45

3. Again, click New to create Re-Enrollment Layout:

- Clone existing layout → name it Re-Enrollment Layout → Save.
- Include fields like previous Enrollment reference (if any), Re-Enrollment Reason, Status, Fees, etc.
- Click Save.

4. Click Page Layout Assignment → Edit Assignment.

5. For each profile and record type:

- New Enrollment → use New Enrollment Layout.

6. Re-Enrollment → use Re-Enrollment Layout.

Click Save.

Activity 3: Enrollment Related Lists to Parent Objects:

Purpose:

To see all Enrollments from Student, Course, and Instructor records.

a) Student → Enrollment Related List

Go to Setup → Object Manager → Student__c.

Click Page Layouts → open the main layout.

In the palette, select Related Lists.

Drag Enrollments related list onto the layout.

Customize columns if needed → Save.

b) Course → Enrollment Related List

Go to Object Manager → Course__c → Page Layouts.

Open layout → add Enrollments related list.

Save.

c) Instructor → Enrollment Related List

Go to Object Manager → Instructor__c → Page Layouts.

Open layout → add Enrollments related list.

Save.

Milestone 10 – Automation with Flow

Activity 1: Auto-Populate Enrollment Date (Record-Triggered Flow)

Purpose:

Set Enrollment__Date__c to today when Enrollment is created.

Steps:

1. Go to Setup → Flows → New Flow.
2. Select Record-Triggered Flow → Create.
3. Object: Enrollment__c.
4. Trigger: A record is created.
5. Optimize for Actions and Related Records → Done.

Select Object

Select the object whose records trigger the flow when they're created, updated, or deleted.

* Object

Enrollment

Configure Trigger

Trigger the Flow When:

- ☒ A record is created
 - ☐ A record is updated
 - ☐ A record is created or updated
 - ☐ A record is deleted
-

Set Entry Conditions

Specify entry conditions to reduce the number of records that trigger the flow and the number of records that trigger the flow to conserve your org's resources.

Condition Requirements

None ▼

6. Add Update Records element:

- Label: Set Enrollment Date.
- Use a record that triggered the flow.
- Field: Enrollment_Date__c → Value: \$Flow.CurrentDate.

7. Save as SetEnrollmentDate →

Activate.

 Update Records

* Label

Set Enrollment Date

* API Name ⓘ

Set_Enrollment_Date

Description

* How to Find Records to Update and Set Their Values

☒ Use the enrollment record that triggered the flow

☐ Update records related to the enrollment record that triggered the flow

☐ Use the IDs and all field values from a record or record collection

☐ Specify conditions to identify records, and set fields individually

Set Filter Conditions

Value

 Running Flow Interview > CurrentDate ×

Activity 2: Send Email When Enrollment Approved

Purpose:

When Enrollment_Status__c = Approved, send email, alert admin, and set Student to Active.

Steps (high level for document):

1. Create Email Template and Email Alert for student notification.
2. Go to Flows → New → Record-Triggered Flow.
3. Object: Enrollment__c, Trigger on update.
4. Condition: Enrollment_Status__c Equals "Approved".

 Configure Start

Enrollment

Configure Trigger

Trigger the Flow When:

☐ A record is created

☐ A record is updated

☒ A record is created or updated

☐ A record is deleted

Set Entry Conditions

Specify entry conditions to reduce the number of records that trigger the flow and the number of times the flow is executed. Minimizing unnecessary flow executions helps to conserve your org's resources.

If you create a flow that's triggered when a record is updated, we recommend first defining entry conditions. Then select the **Only when a record is updated to meet the condition requirements** option for When to Run the Flow for Updated Records.
