

## Enrollment Approved EmailAlert

\* Label

Send Student Email

\* API Name 

Send\_Student\_Email

Description

Use values from earlier in the flow to set the inputs for the "Enrollment Approved EmailAlert" email alert. To use its outputs later in the flow, store them in variables.

### Set Input Values

A<sub>a</sub> \* Record ID 

A<sub>a</sub> Triggering Enrolement\_\_c > Record ID 

7. Add Action to notify Admin if needed.

8. Add Update Records to set Student\_\_c.Status\_\_c = "Active".

9. Save as Enrollment Approved Action → Activate.

### Activity 3: Auto-Assign Instructor Based on Course Category

Purpose:

Assign Instructor automatically based on Course category.

Rules:

Technical → Instructor A

Language → Instructor B

Non-Technical → Instructor C

Steps:

1. Prepare Instructor\_\_c records with codes (e.g., INSTR\_A, INSTR\_B, INSTR\_C).
2. Create Record-Triggered Flow on Enrollment\_\_c (created/updated).
3. Add Get Records to fetch related Course\_\_c.
4. Add Decision element on Course\_\_r.Category\_\_c:
5. Technical / Language / Non-Technical outcomes.
6. For each outcome:
7. Get Instructor record (A/B/C) based on code or name.
8. Update Records: set Instructor\_\_c = Get\_Instructor\_X.Id.
9. Save as AutoAssign\_Instructor → Activate.

## Activity 4: Auto-Create Task for Follow-Up

Purpose:

When Enrollment is “Requested”, create a follow-up task for Admin.

## Steps:

1. Create Record-Triggered Flow on Enrollment\_\_c.
2. Trigger: Record created or updated; condition Enrollment\_Status\_\_c = "Requested".

 Configure Start ✕

\* Object

Enrollment

### Configure Trigger

**Trigger the Flow When:**

☐ A record is created

☐ A record is updated

☒ A record is created or updated

☐ A record is deleted

### Set Entry Conditions

Specify entry conditions to reduce the number of records that trigger the flow and the number of times the flow is executed. Minimizing unnecessary flow executions helps to conserve your org's resources.

If you create a flow that's triggered when a record is updated, we recommend first defining entry conditions. Then select the **Only when a record is updated to meet the condition requirements** option for When to Run the Flow for Updated Records.

Condition Requirements

All Conditions Are Met (AND) ▼

| Field                                                                                                              | Operator            | Value                                                      |                                                                                                  |

## Milestone 11 – Reports:

### Activity 1: Create “Students by Status” Report

1. Go to **Reports** → **New Report**.
2. Report Type: **Students**.
3. Group rows by **Status\_\_c**.
4. Add columns as needed (Name, Email, Phone).
5. Save as **Students by Status**.

## Activity 2: Create “Enrollments by Course” Report

1. New Report → Report Type: **Enrollments**.
2. Grouprows by **Course\_\_r.Name**.
3. Show Record Count per course.
4. Save as **Enrollments by Course**

### Activity 3: Create “Pending Enrollment Approvals” Report

1. New Report → **Enrollments** report type.
2. Filter: **Enrollment\_Status\_\_c = "Requested"**.
3. Add columns (Student, Course, Owner, Created Date).
4. Save as **Pending Enrollment Approvals**.

### Activity 4: Create “Revenue Report (Fees Paid)” Report

1. New Report → **Enrollments** report type.
2. Filter: **Fees\_Paid\_\_c = TRUE**.
3. Group by **Course\_\_r.Name**.
4. Summarize **Course\_Fee\_\_c** or similar fee field.
5. Save as **Revenue Report – Fees Paid**.
