

Milestone 12 – Dashboards:

Activity 1: Create “Student Managemet Dnashboard”

Steps:

1. Go to **Dashboards** → **New Dashboard**.
2. Name: **Student Management Dashboard**.

3. Select folder → **Create**.
4. Select the new Dashboard folder and Save.

Add components:

- **Donut Chart** → using **Students by Status** report.
- **Bar Chart** → using **Enrollments by Course** report.
- **Gauge** → using **Revenue Report – Fees Paid** (sum of revenue field).

- **Table** → using **Pending Enrollment Approvals** report.

4. Arrange components on canvas.

Click **Save** → **Done**.

Milestone 13 – Security Setup

Activity 1: Configure Profiles

):

1. Go to **Setup** → **Profiles** → **New** (or Clone Profiles Required):
 - **Admin** – Full access.
 - **Enrollment Officer** – Create/Update Enrollments.
 - **Instructor** – Read-only access to assigned Enrollments.
2. Steps (example for Enrollment Officer fName: **Enrollment Officer**).
3. In **Object Settings**:
 - **Enrollment__c**: Read, Create, Edit.

- **Student__c** / **Course__c**: Read (and Edit if required).
4. Save.

Repeat similarly for **Instructor** profile with **Read-Only** on Enrollments

Activity 2: Create Permission Sets

1. Go to **Setup** → **Permission Sets** → **New**.
2. Create **Custom Object Access** (additional access to project objects if needed).
3. Create **Dashboard Editor** (Create/Customize Reports & Dashboards permissions).
4. Assign to relevant users.

Activity 3: Configure Sharing & OWD

Steps:

1. Go to **Setup** → **Sharing Settings**.
2. Set **Organization-Wide Defaults**:
 - **Students (Student__c)**: Public Read/Write.
 - **Courses (Course__c)**: Public Read/Write.
 - **Enrollments (Enrollment__c)**: Private.
3. Save.

For Instructor access to assigned Enrollments, optionally:

- Add a **User lookup** on Enrollment (Instructor User).
- Use a simple **Record-Triggered Flow** to set **OwnerId = Instructor User** so they can see only their own records.

7. FUNCTIONAL & PERFORMANCE TESTING

During the testing phase, screenshots were captured from the Salesforce user interface to verify the proper functioning of all implemented features of the Student Enrollment & Course Management System (SECMS). These include student, course, instructor, and enrollment record creation; validation rule checks for mandatory fields, eligibility, and enrollment constraints; verification of record type behavior for different course categories; flow execution for automated enrollment approvals and seat availability checks; and Apex trigger functionality to ensure automatic confirmation and record updates. Additionally, screenshots of generated reports and dashboards were documented to validate accurate data visualization, enrollment tracking, and performance monitoring. Submit the Screenshots while testing.

8. ADVANTAGES & DISADVANTAGES

Advantages

- Centralized data
- Automated workflows
- Real-time reporting

Disadvantages

- Salesforce dependency
- Requires initial configuration effort

9. Conclusion:

The Salesforce Student Enrollment & Course Management System successfully streamlines the entire student academic lifecycle—from student registration and course creation to enrollment management, instructor assignment, approvals, revenue tracking, and reporting. By leveraging Salesforce’s automation tools such as validation rules, flows, approval processes, and dashboards, the system improves data accuracy, operational efficiency, and decision-making. This project demonstrates how Salesforce can transform manual academic processes into a scalable, reliable, and user-friendly digital solution.

10. FUTURE SCOPE

- Payment gateway integration
- Student self-service portal
- Analytics-driven insights
- Mobile access support
